Troubleshooting

The device is not emitting any pulse

- a) Check that you are holding the device correctly, being sure to make contact with the metal ring. See page 4 for further details.
- b) Check that the battery has been inserted the correct way. See the symbol on the reverse of the device for an illustration of the correct polarity.
- c) The battery may no longer contain any charge. Insert a new battery.
- d) If you believe the device suffers from a manufacturing fault, DO NOT attempt to repair the device. Return to the point of purchase. Devices with manufacturing faults are covered by a 12-month replacement guarantee.
